

Part 1

In this section you need to do the following.

- Count the letters of your last name. Do not include any symbols or punctuation in the count, just letters.
 - Put this number here: ____ [We'll call it "x."]
 - If your last name starts with the letter H, then subtract 1 from your number.
 - Put your final number here: ____ [We'll call this "y."]
 - Answer every yth question in part 1. Example: if your number is 8, then answer 8, 16, 24, ... etc. When you get to the end, go around to the beginning. Example: if your number is 8, you will eventually reach 96. The next one will be 7, (since there are 97 total questions) then 15, then 23, then 31... etc.
- Answer 25 questions in total. No more, no less. You have no choices here. Answer what your last name dictates.

1		15		29		43		57		71		85	
2		16		30		44		58		72		86	
3		17		31		45		59		73		87	
4		18		32		46		60		74		88	
5		19		33		47		61		75		89	
6		20		34		48		62		76		90	
7		21		35		49		63		77		91	
8		22		36		50		64		78		92	
9		23		37		51		65		79		93	
10		24		38		52		66		80		94	
11		25		39		53		67		81		95	
12		26		40		54		68		82		96	
13		27		41		55		69		83		97	
14		28		42		56		70		84			

Put an asterisk [*] next to any answers you want to qualify.
Put any qualifications or additional observations here in this box.
