

HoST Fall 2010 Project Form

Name and Date:

-Major or projected major (If you're not sure, put in something, ...anything.)

-What is an interesting modern historical factoid that pertains to your major? You may need to go searching on the internet or (heaven forbid) in a library. Tell me a quick two or three sentence story about the recent history of your major discipline. I don't care about citations or anything. Just tell a credible (or semi-credible) story.

-Now tell me another story about your major, but this time it needs to be pre-1850. You may need to massage your major discipline to make this work. E.g. There wasn't much quantum mechanics pre-1850, but there was atomic theory and statistical mechanics.

Now I just want you to list all your favorite interests/hobbies/things: E.g. Read fiction or nonfiction, play War Craft, make model boats, play piano, write songs, draw, paint, animate, cook, race cars, fantasy base-foot-ball, designing imaginary buildings, making beer, collecting pocketknives, scamming credit card companies, writing fiction, doing standup comedy, biking, soccer, hiking, ceramics, ... etc.

List them here:
