

Name: _____ Chemistry 1110L Lab Section Number: _____

Lab Topic/Title:

Abstract Form with Guidance Through the Process

Answer the following questions with one sentence per question. If necessary, transform your answers into the passive voice. [E.g. Active: I stirred the solution. Passive: The solution was stirred.]

1. What was done and why?

2. What results were found?

3. What conclusions can be drawn from the results or how could the results be applied?

Now put all of your passive answers into this box, in order. Feel free to tweak the final result a bit to make it read better if it sounds wrong. [This box has a 500 character maximum, so you may need to shorten your answers to get them to fit.]

Abstract:

Note: If you are using Adobe Acrobat, you may need to select the text tool  to fill in the fields. If Acrobat does not allow you to use technical symbols that you want to put in, leave a space in your text and write the special symbols in using a pen after you have printed out the page.
